

# Learn To See Auras

Seeing auras, energy or the lights of 'Being' is the subtlest form of sight that can be processed by the human nervous system. The mistake of the intellect | is that this illumination actually emanates from the persons or objects surrounded by it. The ability to 'See' auras corrects this intellectual mistake and accelerates our personal evolution toward lively Self-referral awareness.

Stan Kendz, PhD.

**Goals:** During this illuminating experiential seminar, participants will gain new knowledge that restores their natural ability to consciously feel, see, and draw auras (in color), and heal using their purified and newly enlivened awareness and auric skills.

**Format:** Attendees enjoy several "expanded reality" demonstrations, and experience valuable self-referral consciousness techniques. Included in the workshop is a Kirlian slide presentation and a workshop pamphlet entitled: *Seeing the Auras of Life*.

**Applications:** Auric sight has unlimited practical application for: improving communication and job interview skills, providing information about interpersonal relationships, exercising the brain, stimulating creativity and art, subtle seeing, shifting states of awareness, healing yourself and others, gaining subtle knowledge of the past-present-future, and awakening and establishing lively self-referral awareness.

**Benefits:** Enlivened auric sight and a strong awareness of one's intimate connection to all life are the principal benefits gained during this seminar. In addition, the experience of auric sight provides a new way of knowing about and managing the hidden mysteries of life.

**Personal Gift:** Each participant receives a complimentary personal Kirlian photograph, via snail mail, as a reminder that we are all divinely connected and as an expression of Dr. Stan's appreciation.

**About the Presenter:** Dr. Stan Kendz began seeing auras in his youth, and has helped thousands of people in North America and Europe regain their innate ability to see and manage the auras of light.

Dr. Stan received a PhD. for his consciousness-based research and for the extremely valuable contributions that the analysis of his research data has contributed to the scientific understanding of human consciousness, and its intimate connection to all of the Laws of Nature.

Fondly known as The Good Luck Doctor, Dr. Stan is semi-retired and enjoys spending most of his time traveling, writing books, keynote speaking, consulting and mentoring individuals.
